Online proctoring

Trends

Rapid growth of eLearning

By 2025 eLearning market
will be \$325Bln from
\$165Bln in 2017

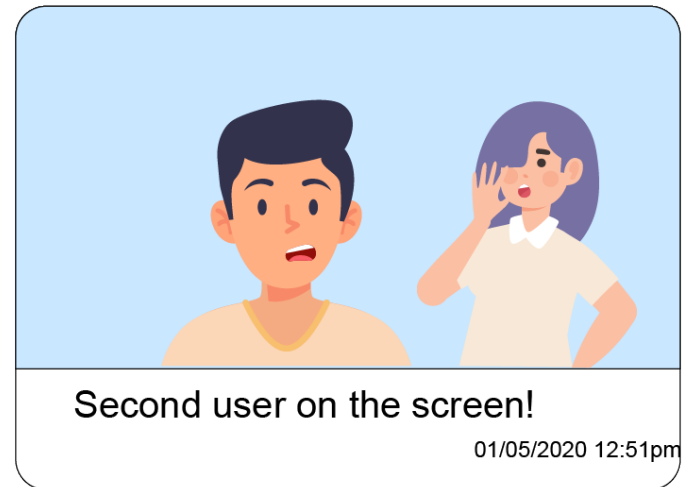

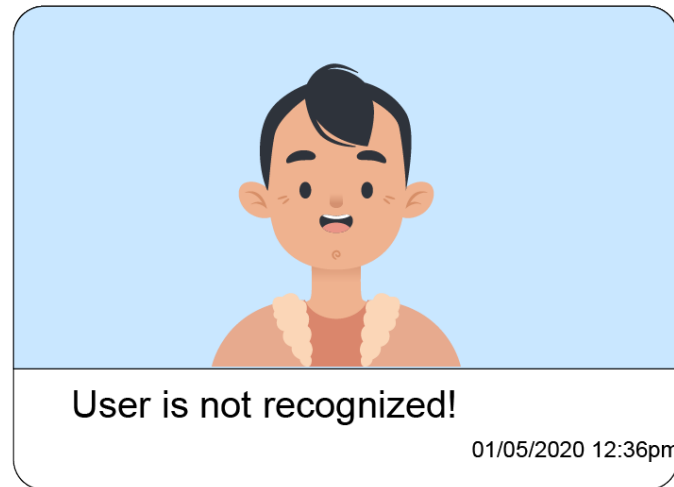

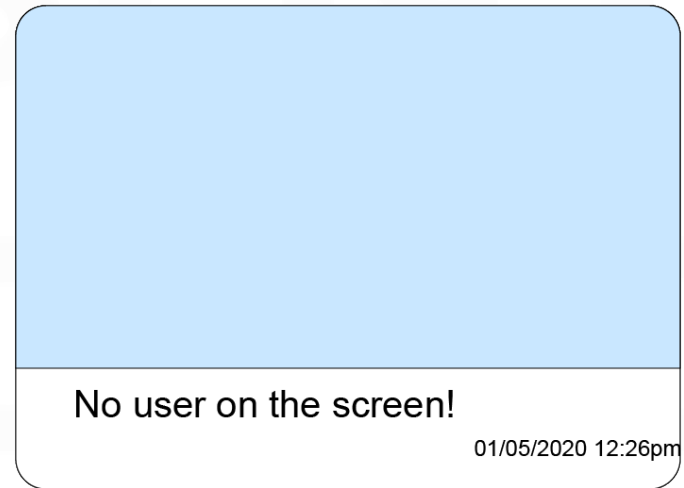

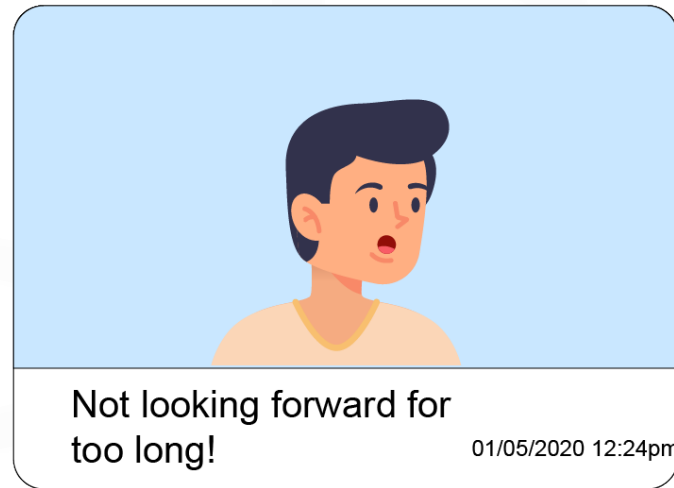

**Growing number of online
assessments**

Millions of tests
performed daily

Problem

Cheating is practiced very widely.

President acknowledged the problem of cheating

Universities became offices for
diploma printing

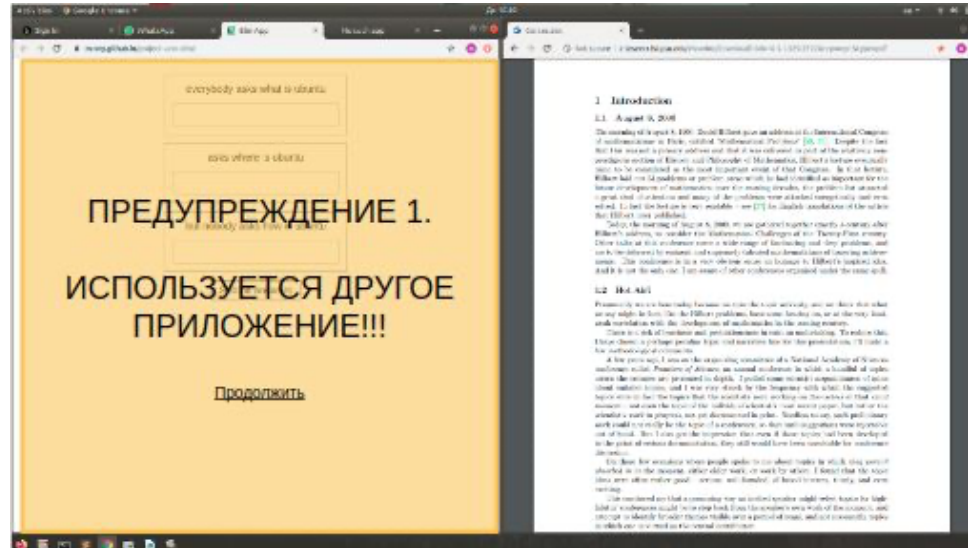

President of RK, Kassym-Zhomart Tokayev

Aero is online proctoring platform that allows to conduct controlled exams for students educated online.

Aero controls if student is:

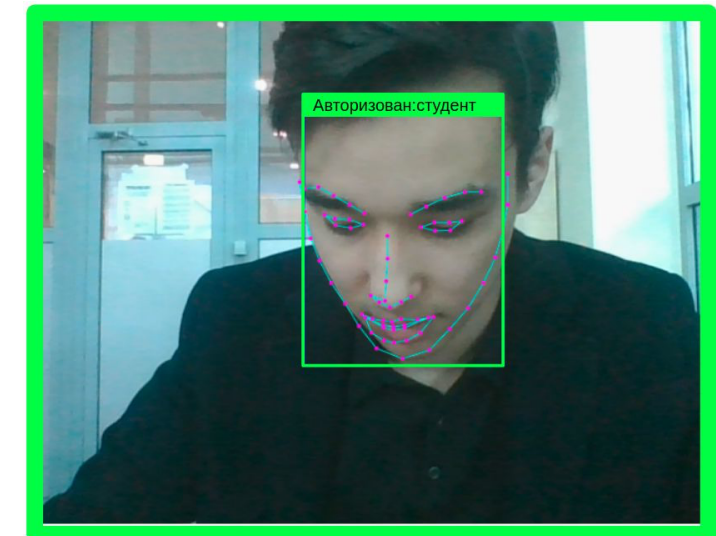

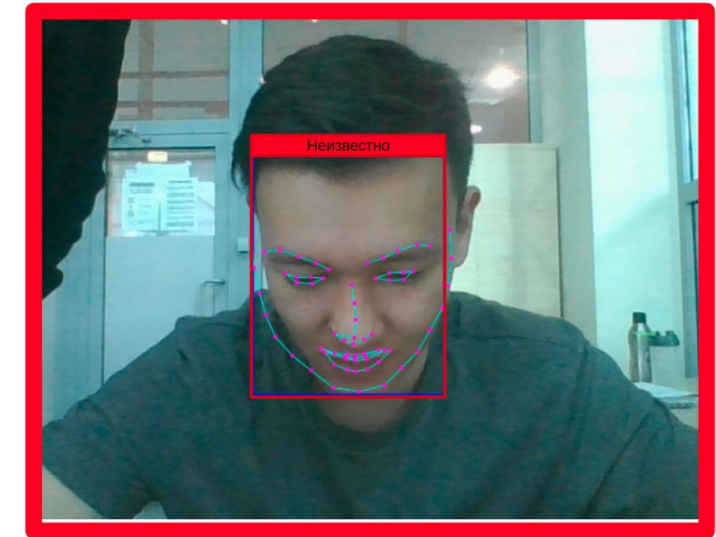

- Looking away from the screen during exam
- Using other websites
- Present during the exam (is not asking other person to take test for him)
- Leaves the exam

It also is effective test conducting platform that automatically grades and checks exams, decreasing workload on the teacher.
